

Core Java Programs (10 Programs)

1. Swap.java

```
class Swap {
    public static void main(String[] args) {
        int a = 10, b = 20;
        int temp = a;
        a = b;
        b = temp;
        System.out.println("a = " + a);
        System.out.println("b = " + b);
    }
}
```

2. Table.java

```
class Table {
    public static void main(String[] args) {
        int n = 5;
        for(int i=1;i<=10;i++)
            System.out.println(n+" x "+i+" = "+(n*i));
    }
}
```

3. SumOfDigits.java

```
class SumOfDigits {
    public static void main(String[] args) {
        int num=1234, sum=0;
        while(num!=0){ sum+=num%10; num/=10; }
        System.out.println("Sum = "+sum);
    }
}
```

4. CountDigits.java

```
class CountDigits {
    public static void main(String[] args) {
        int num=12345, count=0;
        while(num!=0){ count++; num/=10; }
        System.out.println("Digits = "+count);
    }
}
```

5. MaxArray.java

```
class MaxArray {
    public static void main(String[] args) {
        int arr[]={10,50,20,80,30};
        int max=arr[0];
        for(int i=1;i<arr.length;i++)
            if(arr[i]>max) max=arr[i];
        System.out.println("Maximum = "+max);
    }
}
```

6. MinArray.java

```
class MinArray {
    public static void main(String[] args) {
        int arr[]={10,50,20,80,30};
        int min=arr[0];
    }
}
```

```

        for(int i=1;i<arr.length;i++)
            if(arr[i]<min) min=arr[i];
        System.out.println("Minimum = "+min);
    }
}

```

7. ArraySum.java

```

class ArraySum {
    public static void main(String[] args) {
        int arr[]={10,20,30,40};
        int sum=0;
        for(int num:arr) sum+=num;
        System.out.println("Sum = "+sum);
    }
}

```

8. LinearSearch.java

```

class LinearSearch {
    public static void main(String[] args) {
        int arr[]={10,20,30,40,50};
        int key=30;
        for(int i=0;i<arr.length;i++)
            if(arr[i]==key){
                System.out.println("Found at index "+i);
                return;
            }
        System.out.println("Not Found");
    }
}

```

9. StringLength.java

```

class StringLength {
    public static void main(String[] args) {
        String str="Java";
        System.out.println("Length = "+str.length());
    }
}

```

10. ReverseString.java

```

class ReverseString {
    public static void main(String[] args) {
        String str="Java", rev="";
        for(int i=str.length()-1;i>=0;i--)
            rev += str.charAt(i);
        System.out.println("Reverse = "+rev);
    }
}

```
